

September 05, 2025

Dear Valued Residents and Business Owners:

The members of the Totowa Fire Department hope that this letter finds you all healthy and safe. Our department prides itself on protecting our community day in and day out. To continue to do this we need your continued support.

As in recent years, we will continue to conduct our annual fundraiser via mail-in, PayPal, and Venmo. We hope that you can help us by donating so that our department can continue to provide firefighting services to our community.

The support that you have provided to our department in years prior has allowed for continued training and purchasing of vital equipment needed to respond to emergencies. By donating to our fundraising efforts, our department can continue to provide the training and equipment needed to provide the quickest, most efficient response.

Interested in serving your community? We are ALWAYS looking for new volunteers to join our department and helping us to keep our community safe. Training is free! Call 973-956-8644 or stop by any firehouse for more information.

Always be sure to check your smoke and carbon monoxide detectors! Not sure if your detector needs to be replaced? Give our department a call and we can assist you in determining whether your detector should be replaced. If either detector sounds, call 911 right away!

In light of the increased number of fires nationwide associated with the use of lithium-ion batteries we encourage you to exercise caution using these products. NEVER leave lithium-ion batteries charging overnight. If you are unsure of how to use these products properly, we'd be happy to provide support to help keep you safe.

The members of the Totowa Fire Department thank you for your continued support. We look forward to seeing you at our Annual Totowa, West Paterson, and Little Falls Fire Departments' Holiday Parade on November 29th!
